Introduction

Technetix' Click50 is a premise outlet solution designed to meet DOCSIS 3.1 (2 GHz) market demands. The system is designed with migrating networks in mind, to reduce installer time, de-skill, and reduce truck rollouts.

The modular solution can be configured with upgradable components to support migrating networks from HFC to PON. It is entirely future-proof and covers the MoCA frequency band, is simple-to-install, easy-to-modify and can operate in RF and optical networks simultaneously.

The CL50 series is designed to operate at 2 GHz - high performance isolators with ultra-low CPD. It provides full protection against hazardous surge voltages and mains faults. Very high screening efficiency avoids interference and the series is optimised to provide excellent LTE frequency screening (digital dividend).

Available in:

- Three colours: signal white, pure white, and traffic black.
- All standard European frame sizes.

RoSH and WEEE compliant, CE marked.

The Click50:

- is modular, quick and easy to install
- allows easy migration from coax, to hybrid, to fibre networks
- is available in all European footprints
- is compact and aesthetically pleasing
- is flexible and can be configured to meet most applications
- has scope for development and the addition of modular custom features.

The Click50 solution addresses the needs of a changing market, while still providing enhancement to legacy in-home networks across the world.

Colours

The Click50 range is available in three different colours. For a full list of products please see page 23.

Legacy upgrade

Upgrading from 1 GHz to DOCSIS 3.1 2 GHz

Upgrade to FTTH, CATV overlay

New build

Full set of accessories available to build wall outlet from new. Upgrade to FTTH, CATV overlay.

CL50-DGFF-XX Double galvanic isolator

- 2 GHz single output double galvanic isolator
- Compact design
- Fits 25 mm × 50 mm Euro data outlet socket
- 45 degree outlet port
- Flexible mini-coax flylead input with F-type female connector
- Exceeds EN Class A +10 dB screening requirements
- Input F connector secured with 85 mm insulation sleeve

Overview

The CL50-DGFF-XX is a high performance 2 GHz barrel isolator with excellent RF and EMC performance, designed to be fully compatible with the 'Click50' mounting system.

Isolators (frequently referred to as system outlets) are used to separate the in-home installation or subscriber equipment from the CATV network. They prevent hazardous voltages from being transferred to in-home installations.

Technetix supplies two major types of isolator; fully and semi-isolated system outlets.

The CL50-DGFF-XX series comprises of fully isolated/fully galvanic system outlets developed to meet the needs of the European market. They incorporate high voltage capacitors that provide isolation to both the inner and the outer conductors of the coaxial connectors.

Operating to 2 GHz, the CL50-DGFF-XX series offers an isolation solution for full DOCSIS 3.1 deployments while maintaining high levels of performance and protection.

Designed to fit a euro outlet, 25 mm × 50 mm aperture, the CL50-DGFF-XX series offers flexibility to be used in a wide range of install situations.

The CL50-DGFF-XX series is part of the CL50 outlet range of products which offer the operator a complete compact and innovative range of outlets for RF and Fibre installations.

Technetix CPD Safe™

CPD (Common Path Distortion) is well known for producing signal interference on networks. It is caused by electrolytic corrosion or the oxidisation of dissimilar metals when in close contact. Technetix CPD Safe™ technology protects against CPD and:

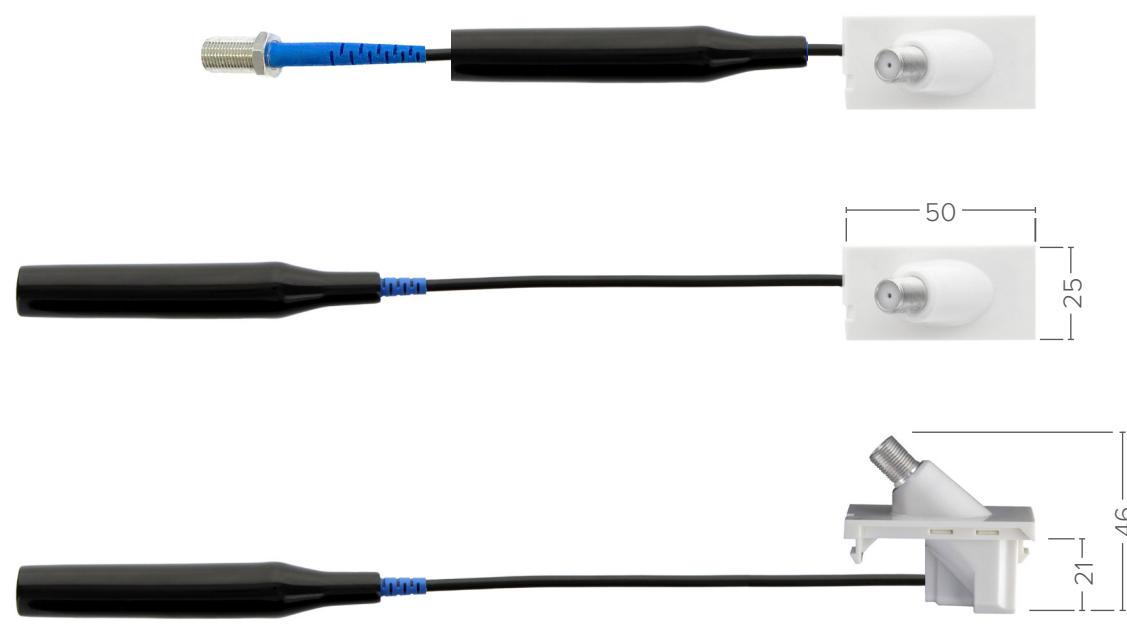

- Removes a primary cause of CPD
- Reduces signal interference on the network
- Drives fewer reported faults
- Reduces truck rolls
- Improves customer service

CL50-SGIM-XX Single galvanic isolator

- 2.0 GHz single output single galvanic isolator
- Compact design
- Fits 25 mm x 50 mm Euro data outlet socket
- 90 degree outlet port
- Cable clamp input
- Exceeds EN Class A +10 dB screening requirements
- Meets cable dimension from RF spec

Overview

The CL50-SGIM-PW is a small compact modular wall outlet compatible with all 'Click50' faceplates and mounting systems. This is a low loss wideband outlet featuring simple connectivity and working from 12 MHz to 2 GHz with excellent RF screening. The cable clamp mechanism accommodates and fixes securely a wide variety of coaxial cables and provides a wide aperture for easy cable insertion.

Isolators (frequently referred to as system outlets) are used to separate the in-home installation or subscriber equipment from the CATV network. They prevent hazardous voltages from being transferred to in-home installations.

Technetix supplies two major types of isolator; fully and semi-isolated system outlets.

The CL50-SGIM-PW series comprises of semi-isolated/single galvanic system outlets developed to meet the needs of the European market. They incorporate high voltage capacitors that provide isolation to the inner conductors of the coaxial connectors.

Operating to 2 GHz, the CL50-SGIM-PW series offers an outlet solution for full DOCSIS 3.1 deployments while maintaining high levels of performance.

Designed to fit a Euro outlet, 25 mm x 50 mm aperture, the CL50-SGIM-PW series offers flexibility to be used in a wide range of install situations.

The CL50-SGIM-PW series is part of the CL50 outlet range of products which offer the operator a complete compact and innovative range of outlets for RF and fibre installations.

Once the cable is connected the outlet snaps into the 'Click 50' faceplate.

Technetix CPD Safe™

Common Path Distortion (CPD) is well known for producing signal interference on networks. It is caused by electrolytic corrosion or the oxidisation of dissimilar metals when in close contact. Technetix CPD Safe™ technology protects against CPD and:

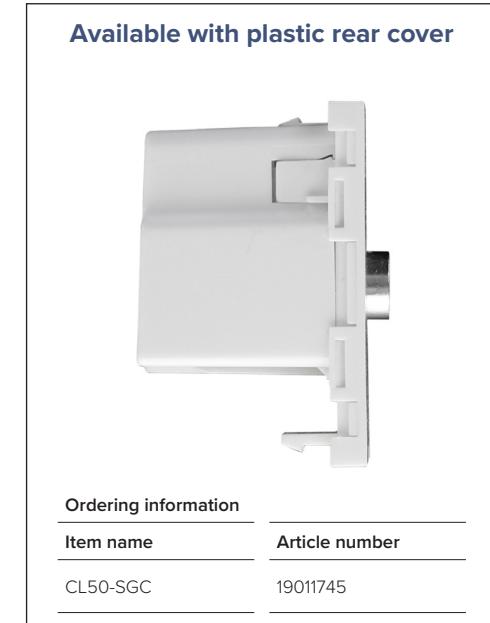

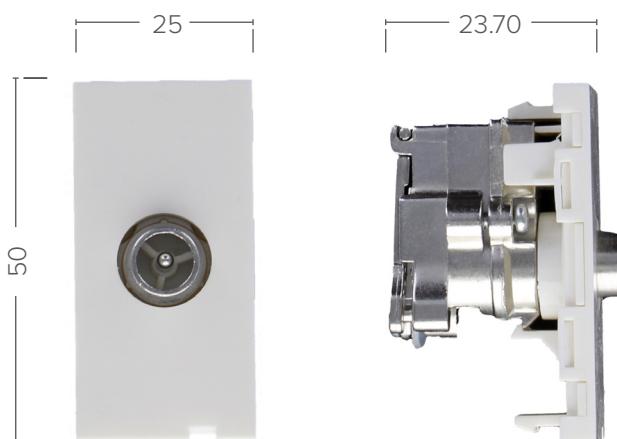

- Removes a primary cause of CPD
- Reduces signal interference on the network
- Drives fewer reported faults
- Reduces truck rolls
- Improves customer service

Optical outlet

- Simplex and duplex LC/APC adapter
- Fits 25 mm x 50 mm Euro data outlet socket
- Integrated fibre management tray
- 45 degree outlet port
- Spring loaded safety shutter
- Designed for left or right outlet slot

Overview

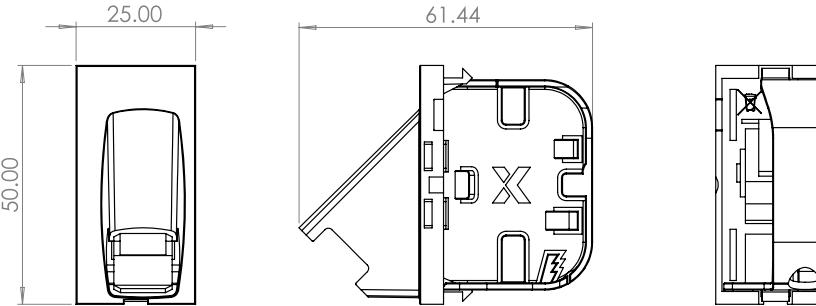

CL50 optical outlets are part of, and are fully compatible with Technetix 'Click50' mounting system. They are equipped with a fibre management tray to enable proper management of fibre cable excess after installation.

Fibre management tray is designed in various options: For left and right outlet slot and with different depth.
